

A/P Automation Success Story

JobRouter®

A powerful all-in-one platform for workflow automation, electronic forms and document management solutions.

Boeing Partner - AMT - Drives Down Expenses with JobRouter

The ability to manage the business process electronically allows for faster approvals, fewer mistakes, and complete visibility into the process.

AMT is an aerospace leader that manufactures high quality complex aeronautic parts. They required a better process to deal with paper based documents including: purchase requests, invoices, expense reports, and purchase requisitions. They also needed to reduce workforce expenses related to manual indexing and archiving purchase orders, shipping documents, manufacturing orders and human resource documents.

DocuWare Integrated Document Management in conjunction with the JobRouter Business Process Management solution provided an efficient way to identify missing documents and send email notifications to the responsible project groups for jobs that are missing required documents, before the manufacturing process starts. JobRouter streamlines the purchase requisition approval and distribution process.

The ability to manage the business process electronically allows for faster approvals, fewer mistakes, and complete visibility into the process.

AMT has a more efficient way to submit purchase requests and expense reports keeping compliant with laws, regulations and internal standards. They have reclaimed valuable real estate by reducing paper documents and they have streamlined their manufacturing process by ensuring quality control on vital documents before they initiate production.

AMT is a leading manufacturer of structural parts for the leading original equipment manufacturer's (OEMs) in the large business and regional jet markets. Our capabilities and strong customer relationships have secured substantial content on the aviation industries most popular aircraft, including the following:

- Boeing 737
- Boeing 777
- Boeing 787
- Bombardier Regional Jets
