

Case Study

Rehab Resources Boosts Efficiency with the Fully Integrated Kronos Workforce Ready Suite in the Cloud

Challenges

Rehab Resources needed a more efficient approach to workforce management. They were using multiple spreadsheets to track employee information, making it difficult to stay on top of schedules at all client facilities and monitor the status of employee certifications and licenses. What's more, updating and maintaining the on-premise systems was placing a significant burden on IT resources. Employee time was manually entered at the end of every pay period — a time-consuming and error-prone process. What Rehab Resources needed was a solution that could:

- Simplify tracking of full-time, part-time, and per-diem employees across all client facilities
- Increase paycheck accuracy and reduce payroll processing time
- Ensure all required credentials stay up-to-date
- Accommodate for future growth with scalability that would also reduce IT's workload

Solutions

The cloud-based Kronos Workforce Ready® solution provides a single, fully integrated workforce management platform that is helping Rehab Resources control labor costs, minimize compliance risk, and improve workforce productivity. Kronos has streamlined time tracking with automated collection of time and attendance information.

Results

Rehab Resources chose Kronos Workforce Ready to deliver a fully integrated solution for timekeeping, payroll, and HR on a single, integrated workforce management platform in the cloud. With automation from Kronos, Rehab Resources has reduced payroll processing time from seven to two days. Workforce Ready automatically tracks employees who may have an expiring license or certification, allowing HR staff to focus on other priorities. Workforce Ready ACA manager has helped Rehab Resources proactively manage Affordable Care Act (ACA) compliance. Rehab Resources has also been able to reallocate IT staff to other projects now that Kronos keeps their system running smoothly.
